

# DULCOneX Gateway

Allow secure and reliable use to be made of IIoT data

The DULCOneX Gateway reliably transfers system data with SSL/TLS encryption to the DULCOneX Cloud via a secure Wi-Fi connection. Depending on type, communication with connected devices is either by Ethernet or by CANopen at field bus level. The gateway forms the heart of the hardware needed to connect pumps, sensors, controllers and disinfection systems with DULCOneX and therefore to allow use to be made of the IIoT data.

## Portfolio of products supported as standard:

- Solenoid-driven metering pumps gamma/ X, gamma/ XL, delta®
- Motor-driven metering pumps Sigma X control type Sigma/ 1, Sigma/ 2, Sigma/ 3
- Controllers DULCOMETER® diaLog DACb, AEGIS II
- UV systems Dulcodes LP, MP
- Chlorine dioxide systems Bello Zon CDVd, CDKd
- DULCOMETER M module, I module
- Peristaltic pump DULCO®flex DF4a
- Peristaltic metering pumps DULCO flex Control DFXa, DFYa

## Your benefits

- Web-based fluid management
- Simple commissioning
- Communication via Wi-Fi
